REMOTE SENSING OF ENVIRONMENT

An Interdisciplinary Journal

SCOPE OF THE JOURNAL

Remote Sensing of Environment serves the diverse remote sensing community with the publication of scientific and technical results on theory, experiments and systems design in remote sensing technology and applications. In addition to original research papers, surveys and summaries of previously piece-wise published works are welcome, as are comprehensive state-of-the-art articles. Tutorial papers of interest to teachers and those engaged in remote sensing training are acceptable if sufficiently broad in their coverage. Brief papers containing little or no analysis but presenting new data will be published as *Short Communications*.

Editor-in-Chief

MARVIN E. BAUER
Remote Sensing Laboratory, University of Minnesota
110 Green Hall, 1530 N. Cleveland Ave., St. Paul, MN 55108

Associate Editors

K. YA. KONDRATYEV
Academy of Sciences, U.S.S.R.

DAVID A. LANDGREBE
Purdue University

DAVID S. SIMONETT
University of California, Santa Barbara

GWYNN H. SUITS
University of Michigan

GEORGE J. ZISSIS
Environmental Research Institute of Michigan

Editorial Board

PAUL BOCK
University of Connecticut

N. J. J. BUNNIK
National Aerospace Laboratory
The Netherlands

MURRAY FELSHER
Washington Remote Sensing Letter

G. GUYOT
Institut National de la Recherche Agronomique, France

FREEMAN F. HALL
Environmental Research Laboratories, NOAA

VYTAUTAS KLEMAS
University of Delaware

RONALD J. P. LYON
Stanford University

RICHARD K. MOORE
University of Kansas

JACK F. PARIS
Jet Propulsion Laboratory

WILLARD J. PIERSON
City University of New York

EDWARD M. RISLEY
EROS Program, U.S. Geological Survey

HAROLD W. YATES
National Earth Satellite Service, NOAA

REMOTE SENSING OF ENVIRONMENT

An Interdisciplinary Journal

Volume 14, Numbers 1–3, January 1984

Contents

Introduction 1

E. P. CRIST (Ann Arbor, MI)
Effects of Cultural and Environmental Factors on Corn and Soybean Spectral Development Patterns 3

G. D. BADHWAR (Houston, TX)
Automatic Corn-Soybean Classification Using Landsat MSS Data. I. Near Harvest Crop Proportion Estimation 15

G. D. BADHWAR (Houston, TX)
Automatic Corn-Soybean Classification Using Landsat MSS Data. II. Early Season Crop Proportion Estimation 31

J. B. ODENWELLER (Berkely, CA) and K. I. JOHNSON (Ann Arbor, MI)
Crop Identification Using Landsat Temporal-Spectral Profiles 39

K. E. HENDERSON and G. D. BADHWAR (Houston, TX)
An Initial Model for Estimating Soybean Development Stages from Spectral Data 55

J. L. HATFIELD (Lubbock, TX), G. ASRAR, and E. T. KANEMASU (Manhattan, KS)
Intercepted Photosynthetically Active Radiation Estimated by Spectral Reflectance 65

NARENDA S. GOEL, DONALD E. STREBEL, and RICHARD L. THOMPSON (Binghamton, NY)
Inversion of Vegetation Canopy Reflectance Models for Estimating Agronomic Variables. II. Use of Angle Transforms and Error Analysis as Illustrated by Suits' Model 77

F. T. ULABY, C. ALLEN, G. EGER III (Lawrence, KS), and E. KANEMASU (Manhattan, KS)
Relating the Microwave Backscattering Coefficient to Leaf Area Index 113

T. J. JACKSON (Beltsville, MD), T. J. SCHMUGGE, and P. O'NEILL (Greenbelt, MD)
Passive Microwave Remote Sensing of Soil Moisture from an Aircraft Platform 135

G. P. MILLER, M. FUCHS, M. J. HALL, G. ASRAR, E. T. KANEMASU, and D. E. JOHNSON (Manhattan, KS)
Analysis of Seasonal Multispectral Reflectances of Small Grains 153

CHARLES R. PERRY, JR. and LYLE F. LAUTENSCHLAGER (Houston, TX)
Functional Equivalence of Spectral Vegetation Indices **169**

CECIL R. HALLUM and CHARLES R. PERRY, JR. (Houston, TX)
Estimating Optimal Sampling Unit Sizes for Satellite Surveys **183**

R. K. LENNINGTON, C. T. SORENSEN, and R. P. HEYDORN (Houston, TX)
A Mixture Model Approach for Estimating Crop Areas from Landsat Data **197**

RAJ S. CHHIKARA (Houston, TX)
Effect of Mixed (Boundary) Pixels on Crop Proportion Estimation **207**

H. W. YATES, J. D. TARPLEY, S. R. SCHNIEDER, D. F. McGINNIS, and R. A. SCOFIELD (Washington, DC)
The Role of Meteorological Satellites in Agricultural Remote Sensing **219**

ERIC P. CRIST and RICHARD C. CICONE (Ann Arbor, MI)
Comparisons of the Dimensionality and Features of Simulated Landsat-4 MSS and TM Data **235**

G. D. BADHWAR, K. E. HENDERSON, D. E. PITTS, W. R. JOHNSON, M. L. SESTAK, T. WOOLFORD, and J. CARNES (Houston, TX)
Comparison of Simulated Thermatic Mapper Data and Multispectral Scanner Data **247**

RICHARD C. CICONE and MICHAEL D. METZLER (Ann Arbor, MI)
Comparison of Landsat MSS, Nimbus-7 CZCS, and NOAA-7 AVHRR Features for Land-Use Analysis **257**

SHARON L. WALL, RANDALL W. THOMAS, and CATHERINE E. BROWN (Berkeley, CA), and ETHEL H. BAUER (Moffett Field, CA)
Landsat-Based Inventory System for Agriculture in California **267**

Volume 15, Number 1, February 1984

Contents

HSIAO-HUA K. BURKE, CLINTON J. BOWLEY, AND JAMES C. BARNES (Concord, MA)
Determination of Snowpack Properties from Satellite Passive Microwave Properties **1**

D.A. GAGLIARDINI, H. KARSZENBAUM (Buenos Aires, Argentina), R. LEGECKIS (Washington, DC), AND V. KLEMAS (Newark, DE)
Application of Landsat MSS, NOAA/TIROS AVHRR, and Nimbus CZCS to Study the La Plata River and Its Interaction with the Ocean **21**

TENG XUYAN, SHI CHANGQING, PENG HONGXIAN (Changchun, China), XIAO JINKAI, LAI ZHAOSHENG, AND YANG BOLIN (Guiyang, China)
Passive Microwave Radiometry in the Gobi-Desert Region **37**

PAUL HALPERN (Palo Alto, CA)
Ground Level Solar Energy Estimates Using Geostationary Operational Environmental Satellite Measurements and Realistic Model Atmospheres **47**

FRED M. VUKOVICH (Triangle Park, NC)
A Comparison of Surface Temperature Derived from HCMM Infrared Measurements with Field Data **63**

G. DANIEL HICKMAN, JOHN A. EDMONDS (McLean, VA), AND RICHARD V. LYNCH III (Washington, D.C.)
Laser-Induced Marine Bioluminescence Measurements and the Potential for Airborne Remote Sensing 77

Volume 15, Number 2, March 1984

Editorial Note 93

YORAM J. KAUFMAN AND ROBERT S. FRASER (Greenbelt, MD)
Atmospheric Effect on Classification of Finite Fields 95

TSAN MO (Silver Spring, MD), THOMAS J. SCHMUGGE (Greenbelt, MD), AND THOMAS J. JACKSON (Beltsville, MD)
Calculations of Radar Backscattering Coefficient of Vegetation-Covered Soils 119

QUANAN ZHENG, V. KLEMAS (Newark, DE), AND NORDEN E. HUANG (Wallops Island, VA)
Dynamics of the Slope Water off New England and Its Influence on the Gulf Stream as Inferred from Satellite IR Data 135

A. R. HUETE, D. F. POST (Tucson, AZ), AND R. D. JACKSON (Phoenix, AZ)
Soil Spectral Effects on 4-Space Vegetation Discrimination 155

GEORGE NAGY (Lincoln, NE)
Advances in Information Extraction Techniques 167

Short Communication

HAROLD W. GAUSMAN (Lubbock, TX)
Evaluation of Factors Causing Reflectance Differences between Sun and Shade Leaves 177

Announcement 183

Volume 15, Number 3, June 1984

Contents

H. J. EOM AND A. K. FUNG (Lawrence, KS)
A Scatter Model for Vegetation up to Ku-Band 185

ROSS NELSON (Greenbelt, MD), WILLIAM KRABILL, AND
GORDON MACLEAN (Wallops Island, VA)
Determining Forest Canopy Characteristics Using Airborne Laser Data 201

ROGER A. HOLMES (Flint, MI)
Advanced senor Systems: Thematic Mapper and Beyond 213

NARENDRA S. GOEL AND RICHARD L. THOMPSON (Binghamton, NY)
Inversion of Vegetation Canopy Reflectance Models for Estimating Agronomic Variables. III. Estimation Using Only Canopy Reflectance Data as Illustrated by the Suits Model 223

NARENDRA S. GOEL AND RICHARD THOMPSON (Binghamton, NY)
Inversion of Vegetation Canopy Reflectance Models for Estimating Agronomic Variables. IV. Total Inversion of the SAIL Model 237

Short Communications

COMPTON J. TUCKER, BRENT N. HOLBEN, AND
THOMAS E. GOFF (Greenbelt, MD)
Intensive Forest Clearing in Rondonia, Brazil, as Detected by Satellite Remote Sensing 255

BRUCH W. FITCH (San Diego, CA), ROBERT L. WALRAVEN (Davis, CA),
AND DEIRDRE E. BRADLEY (Davis, CA)
Polarization of Light Reflected from Grain Crops during the Heading Growth Stage 263

Erratum 269
